Country	2017	2018	2019	2020	2021
Brazil	12053	13165	15482	16982	18998
United States	8562	7453	9321	6349	4500
China	8391	4555	7397	8921	7507
European Union	4563	4871	4989	5551	6603
India	8776	9091	8898	9769	10806
Mexico	4898	3777	2992	3878	4003
Spain	3325	2671	2906	3287	3422
Egypt	1784	2117	2453	2643	2900

The table and chart above present orange production data for major producing countries from 2017 to 2021. Overall, Brazil shows a consistent and significant increase in production, making it the leading producer by a large margin. India also demonstrates steady growth over the five-year period. In contrast, the United States shows a noticeable decline, especially after 2019, indicating a drop in production levels. The European Union and Egypt both display gradual increases, while countries like Mexico and Spain remain relatively stable with minor fluctuations. China shows some variability but maintains a generally strong level of production. Based on these trends, it can be concluded that global orange production is increasingly dominated by countries with consistent growth, particularly Brazil and India, while other regions are experiencing slower growth or decline.
